Table of contents, volume 191, 1993

Number 1

D. Landstein, S. (Malis) Arad, Z. Barak: Relationships among the herbicide and functional sites of acetohydroxy acid synthase from *Chlorella emersonii* 1

D.H.P. Barratt, J.A. Clark: A stress-induced developmentally regulated, highly polymorphic protein family in *Pisum sativum* L. 7

M. Petersen: Purification of rosmarinic acid synthase from cell cultures of *Coleus blumei* Benth. 18

K. Meierhoff, P. Westhoff: Differential biogenesis of photosystem II in mesophyll and bundle-sheath cells of monocotyledonous NADP-malic enzyme-type C_4 plants: the non-stoichiometric abundance of the subunits of photosystem II in the bundle-sheath chloroplasts and the translational activity of the plastome-encoded genes 23

Z. Drechsler, R. Sharkia, Z.I. Cabantchik, S. Beer: Bicarbonate uptake in the marine macroalga *Ulva* sp. is inhibited by classical probes of anion exchange by red blood cells 34

W. Daeter, W. Hartung: The permeability of the epidermal cell plasma membrane of barley leaves to abscisic acid 41

K. Palmqvist: Photosynthetic CO_2-use efficiency in lichens and their isolated photobionts: the possible role of a CO_2-concentrating mechanism 48

M.R. Badger, H. Pfanz, B. Büdel, U. Heber, O.L. Lange: Evidence for the functioning of photosynthetic CO_2-concentrating mechanisms in lichens containing green algal and cyanobacterial photobionts 57

B.J. Pogson, C.J. Brady: Accumulation of the β-subunit of polygalacturonase 1 in normal and mutant tomato fruit 71

C. Stöhr, R. Tischner, M.R. Ward: Characterization of the plasma-membrane-bound nitrate reductase in *Chlorella saccharophila* (Krüger) Nadson 79

T. Albrecht, A. Kehlen, K. Stahl, H.-D. Knöfel, G. Sembdner, E.W. Weiler: Quantification of rapid, transient increases in jasmonic acid in wounded plants using a monoclonalantibody 86

J. Xue, U. Pihlgren, L. Rask: Temporal, cell-specific, and tissue-preferential expression of myrosinase genes during embryo and seedling development in *Sinapsis alba* 95

J. Kopka, M. Robers, R. Schuch, F. Spener: Acyl carrier proteins from developing seeds of *Cuphea laneolata* Ait. 102

A. Gollotte, V. Gianiazzi-Pearson, M. Giovannetti, C. Sbrana, L. Avio, S. Gianinazzi: Cellular localization and cytochemical probing of resistance reactions to arbuscular mycorrhizal fungi in a 'locus a' myc$^-$ mutant of *Pisum sativum* L. 112

H. Peña-Cortés, T. Albrecht, S. Prat, E.W. Weiler, L. Willmitzer: Aspirin prevents wound-induced gene expression in tomato leaves by blocking jasmonic acid biosynthesis 123

T.W. Becker, C. Perrot-Rechenmann, A. Suzuki, B. Hirel: Subcellular and immunocytochemical localization of the enzymes involved in ammonia assimilation in mesophyll and bundle-sheath cells of maize leaves 129

S. Yu, M. Pedersén: α-1,4-Glucan lyase, a new class of starch/glycogen-degrading enzyme. II. Subcellular localization and partial amino-acid sequence 137

Number 2

F. Baluška, J.S.D. Parker, P.W. Barlow: A role for gibberellic acid in orienting microtubules and regulating cell growth polarity in the maize root cortex 149

V.A. Smith: Gibberellin translocation in *Pisum sativum* L. III. Biological and biochemical consequences of the *le* mutation 158

R. Radetzky, I. Feussner, R.R. Theimer, H. Kindl: Transient occurrence of lipoxygenase and glycoprotein gp49 in lipid bodies during fat mobilization in anise seedlings 166

J. Glaab, W.M. Kaiser: Rapid modulation of nitrate reductase in pea roots 173

H. Winter, D.G. Robinson, H.W. Heldt: Subcellular volumes and metabolite concentrations in barley leaves 180

D. Selmar: Transport of cyanogenic glucosides: linustatin uptake by *Hevea* cotyledons 191

P. Ahl Goy, H. Signer, R. Reist, R. Aichholz, W. Blum, E. Schmidt, H. Kessmann: Accumulation of scopoletin is associated with the high disease resistance of the hybrid *Nicotiana glutinosa* × *Nicotiana debneyi* 200

T. Sakuth, C. Schobert, A. Pecsvaradi, A. Eichholz, E. Komor, G. Orlich: Specific proteins in the sieve-tube exudate of *Ricinus communis* L. seedlings: separation, characterization and in-vivo labelling 207

E. Liscum, R.P. Hangarter: Photomorphogenic mutants of *Arabidopsis thaliana* reveal activities of multiple photosensory systems during light-stimulated apical-hook opening 214

R.F. Sage, C.D. Reid, B. d. Moore, J.R. Seemann: Long-term kinetics of the light-dependent regulation of ribulose-1,5-bisphosphate carboxylase/oxygenase activity in plants with and without 2-carboxyarabinitol 1-phosphate 222

E.B. Blancaflor, K.H. Hasenstein: Organization of cortical microtubules in graviresponding maize roots 231

C. Shichijo, T. Hamada, M. Hiraoka, C.B. Johnson, T. Hashimoto: Enhancement of red-light-induced anthocyanin synthesis in sorghum first internodes by moderate low temperature given in the pre-irradiation culture period 238

W. Kreis, H. Hoelz, R. Sutor, E. Reinhard: Cellular organization of cardenolide biotransformation in *Digitalis grandiflora* Mill. 246

E. Komor, I. Liegl, C. Schobert: Loading and translocation of various cytokinins in phloem and xylem of the seedlings of *Ricinus communis* L. 252

B.-Q. Huang, G.W. Strout, S.D. Russell: Fertilization in *Nicotiana tabacum:* ultrastructural organization of propane-jet-frozen embryo sacs in vivo 256

J. Marquardt, R. Bassi: Chlorophyll-proteins from maize seedlings grown under intermittent light conditions. Their stoichiometry and pigment content 265

F. Sitbon, A. Edlund, P. Gardeström, O. Olsson, G. Sandberg: Compartmentation of indole-3-acetic acid metabolism in protoplasts isolated from leaves of wild-type and IAA-overproducing transgenic tobacco plants 274

A. Musgrave, F. Schuring, T. Munnik, K. Visser: Inositol 1,4,5-triphosphate as fertilization signal in plants: testcase *Chlamydomonas eugemetos* 280

I.R. White, A. Wise, P.A. Millner: Evidence for G-protein-linked receptors in higher plants: stimulations of GTP-gamma-S binding to membrane fractions by the mastoparan analogue mas 7 285

J.-F. Manen, P. Simon: A possible explanation for the multiple polyadenylation sites in transcripts coding for a winged-bean leghemoglobin 289

Number 3

B.T. Mawson: Regulation of blue-light-induced proton pumping by *Vicia faba* L. guard-cell protoplasts: Energetic contributions by chloroplastic and mitochondrial activities 293

F.J.M. Maathuis, D. Sanders: Energization of potassium uptake in *Arabidopsis thaliana* 302

D. Michaud, A. Seye, A. Driouich, S. Yelle, L. Faye: Purification and partial characterization of an acid β-fructosidase from sweet-pepper (*Capsicum annuum* L.) fruit 308

H. Tschiersch, E. Ohmann: Photoinhibition in *Euglena gracilis:* Involvement of reactive oxygen species 316

E. Soler, M. Chlastre, B. Bantignies, G. Marigo, C. Ambid: Uptake of *iso*pentenyl diphosphate by plastids isolated from *Vitis vinifera* L. cell suspensions 324

M.R. Blatt, F. Armstrong: K^+ channels of stomatal guard cells: Abscisic-acid-evoked control of the outward rectifier mediated by cytoplasmic pH 330

P.L. Keeling, P.J. Bacon, D.C. Holt: Elevated temperature reduces starch deposition in wheat endosperm by reducing the activity of soluble starch synthase 342

Z.-C. Li, D.M. Durachko, D.J. Cosgrove: An oat coleoptile wall protein that induces wall extension in vitro and that is antigenically related to a similar protein from cucumber hypocotyls 349

A.R. McDonald, B. Liu, H.C. Josdhi, B.A. Palevitz: γ-Tubulin is associated with a cortical-microtubule-organizing zone in the developing guard cells of *Allium cepa* L. 357

H. Stabenau, U. Winkler, W. Säftel: Localization of glycolate dehydrogenase in two species of *Dunaliella* 362

S. Veljovic-Jovanovic, W. Bilger, U. Heber: Inhibition of photosynthesis, acidification and stimulation of zeaxanthin formation in leaves by sulfur dioxide and reversal of the effects 365

W. Pfeiffer, A. Hager: A Ca^{2+}-ATPase and a Mg^{2+}/H^+-antiporter are present on tonoplast membranes from roots of *Zea mays* L. 377

A.C. McCormac, H. Smith, G.C. Whitelam: Photoregulation of germination in seed of transgenic lines of tobacco and *Arabidopsis* which express an introduced cDNA encoding phytochrome A or phytochrome B 386

U. Heim, H. Weber, H. Bäumlein, U. Wobus: A sucrose-synthase gene of *Vicia faba* L.: Expression pattern in developing seeds in relation to starch synthesis and metabolic regulation 394

P. Perata, N. Geshi, J. Yamaguchi, T. Akazawa: Effect of anoxia on the induction of α-amylase in cereal seeds 402

G. Zotz, K. Winter: Short-term photosynthesis measurements predict leaf carbon balance in tropical rain-forest canopy plants 409

K. Laporte, M. Rissognol, J.A. Traas: Interaction of tubulin with the plasma membrane: tubulin is present in purified plasmalemma and behaves as an integral membrane protein 413

M. Schellenberg, P. Matile, H. Thomas: Production of a presumptive chlorophyll catabolite in vitro: Requirement for reduced ferredoxin 417

Number 4

I.E. Woodrow, K.A. Mott: Modelling C_3 photosynthesis: A Sensitivity analysis of the photosynthetic carbon-reduction cycle 421

N. Bernstein, W.K. Silk, A. Läuchli: Growth and development of sorghum leaves under conditions of NaCl stress. Spatial and temporal aspects of leaf growth inhibition 433

W.R. McLauchlan, R.A. McKee, D.M. Evans: The purification and immunocharacterisation of N-methylputrescine oxidase from transformed root cultures of *Nicotiana tabacum* L. cv SC58 440

R. Turgeon, D.U. Beebe, E. Gowan: The intermediary cell: Minor-vein anatomy and raffinose oligosaccharide synthesis in the Scrophulariaceae 446

M.D. Brownleader, P.M. Dey: Purification of extensin from cell walls of tomato (hybrid of *Lycopersicon esculentum* and *L. peruvianum*) cells in suspension culture 457

H. Schlüpmann, A. Bacic, S.M. Read: A novel callose synthase from pollen tubes of *Nicotiana* 470

S.M. Swain, J.B. Reid, J.J. Ross: Seed development in *Pisum*. The lh^l allele reduces gibberellin levels in developing seeds, and increases seed abortion 482

R. Schmid, M.J. Dring: Evidence for two different blue-light-receptor systems for the fast responses of stimulation of photosynthetic capacity and acidification of the plant surface in brown algae 489

G. Cai, A. Bartalesi, C. Del Casino, A. Moscatelli, A. Tiezzi, M. Cresti.: The kinesin-immunoreactive homologue from *Nicotiana tabacum* pollen tubes: Biochemical properties and subcellular localization 496

J.L. Araus, J. Bort, R.H. Brown, C.L. Bassett, N. Cortadellas: Immunocytochemical localization of phosphoenolpyruvate carboxylase and photosynthetic gas-exchange characteristics in ears of *Triticum durum* Desf. 507

G.F.E. Scherer, B. André: Stimulation of phospholipase A_2 by auxin in microsomes from suspension-cultured soybean cells is receptor-mediated and influenced by nucleotides 515

E.A. Griess, K.D. Grasser, G. Feix: Repeat units from a maize rDNA external spacer region exhibit DNA curvature and interact with high-mobility-group proteins 524

K. Masuda, S. Takahashi, K. Nomura, M. Arimoto, M. Inoue: Residual structure and constituent proteins of the peripheral framework of the cell nucleus in somatic embryos from *Daucus carota* L. 532

P.J. White: Characterization of a high-conductance, voltage-dependent cation channel from the plasma membrane of rye roots in planar lipid bilayers 541

C.-d. Han, W. Patrie, M. Polacco, E.H. Jr. Coe: Aberrations in plastid transcripts and deficiency of plastid DNA in striped and albino mutants in maize 552
